RCI's Rooftop Quality Assurance Course

On April 8-9, 2015, the Ontario Chapter delivered the Rooftop Quality Assurance Course at its headquarters in Richmond Hill, Ontario.

This two-day course is for professionals interested in observation to help assure roof installation is consistent with construction documents. The program provided insight on the diverse and challenging aspects of roofing as encountered in the field and is ideal for roofing material manufacturers, general contractors, quality assurance observers, and field inspectors.

Course participants received objective and knowledgeable insight to the field of Roof Observation and role delineation for the observer. Additionally, the course will help prepare individuals to provide an independent measure of quality, assist with project communications, and coordination.

Successful students will be able to apply roofing technology to the observer function.

RCI Ontario would like to thank the following presenters:

Dave Miller
Greg Wallace
Darrel Henderson
